### FINAL INTERIM REMEDIAL ACTION – CONSTRUCTION TECHNICAL REPORT, SITE WP-12, BEALE AIR FORCE BASE, YUBA COUNTY

Dear Mr. O'Brien:

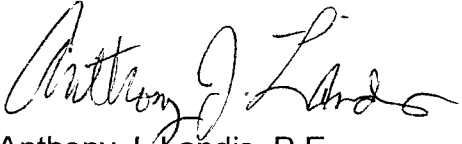

The Department of Toxic Substances Control (DTSC) has reviewed and approves the subject document, dated April 2006 and revised May 11, 2006 in response to DTSC comments provided May 9, 2006. The Air Force conducted a removal action at Site 12, the Former Entomology Lab, to excavate and dispose of near-surface soils contaminated with pesticides such as DDT, DDE, DDD, aldrin, dieldrin, chlordane, and heptachlor. The contaminated soil was sent to a Class I Hazardous Waste Landfill for disposal.

Approximately 1050 tons of contaminated soil was removed. Samples collected at 25 locations confirm that the remaining soil concentrations are below the approved Preliminary Cleanup Goals. The excavated areas, approximately 0.4 acre and 750 linear feet of roadside drainage ditch, were backfilled with clean soil to grade. DTSC concurs with the Report's conclusions that the removal action is complete. A risk assessment is being prepared and will be provided as part of a proposed No Further Response Action Planned Decision Document.

Mr. Michael O'Brien
